Allowable Subject Matter

1. Claims 1-35 are allowed.

The present invention aims to reduce the burden of an encoder that performs most of the compression computations by instituting an "active" decoder. Conventionally, the encoder performs all the calculations, informs the decoder of its decisions, and transmits the video data to the decoder along with instructions for reconstruction of each picture. The present invention as claimed requires the decoder to independently determine the structural information such as image segmentation, geometry, color and/or brightness hence these information need not be transmitted by the encoder. The decoder then reconstruct image data from the structural information along with kinetic information transmitted by the encoder. As a result, the encoder needs only send information that the decoder cannot determine on its own, thus greatly reducing the overhead and resulting in a much smaller bitstream. The claimed invention as summarized above is neither anticipated nor rendered obvious by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vu Le whose telephone number is 703-308-6613. The examiner can normally be reached on M-F 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chris Kelley can be reached on 703-305-4856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
